# ARIZONA LITHOGRAPHERS

A special announcement from Arizona Litho

[www.azlitho.com](http://www.azlitho.com)

## Arizona Litho is Now 100% Wind-Powered!

Arizona Lithographers is proud to announce that all of the electrical power used in our facilities is offset by clean 100% new wind energy. We undertook this initiative to do our part in improving the environment. Electricity production relying on fossil fuels is the leading cause of industrial air pollution in the United States.

Over the course of one year our commitment to wind power energy will displace over 1.98 million pounds of carbon dioxide from being emitted into the environment by conventional resources. These environmental benefits are the equivalent to not driving 163 passenger cars for one year.

That's why we chose clean renewable wind power energy... It's simply the right thing to do for the environment.

We can demonstrate the savings in lbs. of air emissions NOT generated, cubic feet of natural gas UNUSED, number of miles NOT driven or the equivalent of how many trees would have to be planted to equal the energy difference wind power makes on every project we have the opportunity to quote and produce for you.

We are now allowed to print Wind Power, Clean Watts and 100% Clean Wind Power Energy logos declaring use of an alternative power source and if you use recycled paper on your printed project you can declare your printed piece Green by using the appropriate logos in your literature.

We can supply the logos for your use on projects we print.

**Thank you for keeping Arizona Lithographers in mind for your printing needs.**

We are proud to announce that Arizona Lithographers with our ongoing efforts to be environmentally responsible now uses 100% Clean Wind Power Energy in the production of all printed materials.

We are now allowed to print Wind Power, Clean Watts and 100% Clean Wind Power Energy logos declaring use of an alternative power source and if you use recycled paper on your printed project you can declare your printed piece Green by using the appropriate logos in your literature.
